

CLT3 Dawn/Dusk Lighting Controller

- Digital dawn/dusk controller designed for dimming high frequency fluorescent light fittings.
- Other types of fluorescent & tungsten lighting can be controlled with the addition of suitable load control devices.
- Ramp up (dawn) and down (dusk) times are independently adjustable to simulate natural light patterns.
- Dawn & dusk cycles triggered via an external timeclock contact.
- Allows setting of the minimum and maximum percentage light levels.
- Digital display shows the current lighting level.
- Manual override of the light level and ramp times by the push of a button.
- Can be built into a *Climatec*, built to order lighting control panel.
- Available as:
 - Panel Mount.
